

# Miopericytoma

**Kod Orpha: 289685 Kod OMIM:**

## Opis choroby \*

### Definicja

A rare soft tissue tumor characterized by a benign subcutaneous lesion composed of oval-to-spindle shaped myoid appearing cells with a tendency for concentric perivascular growth. The tumor usually presents as a painless, slowly growing nodule, which may be solitary or appear as multiple lesions, which then arise metachronously and usually involve a particular anatomic region. Recurrence after surgical excision may occur in poorly circumscribed tumors. Malignancy is very rare.
