

# **Wyściółczak dodatni pod względem fuzji RELA**

## **Kod Orpha: 530792 Kod OMIM:**

### **Opis choroby \***

#### **Definicja**

A rare ependymal tumor characterized by the presence of a *RELA* fusion gene. This supratentorial grade II or III ependymoma most often occurs in children and young adults. Histopathological features are variable, but a distinctive vascular pattern of branching capillaries or clear-cell change are common. Patients may present with focal neurological deficits, seizures, or features of raised intracranial pressure. Prognosis is worse than in other supratentorial ependymomas.
