

# Chłoniak wewnętrzny z dużych komórek B

## Kod Orpha: 98839 Kod OMIM:

### Opis choroby \*

#### Definicja

Intravascular large B-cell lymphoma (IVLBCL) is a very rare form of diffuse large B-cell lymphoma (see this term) characterized by the selective growth of lymphoma cells within the lumina of small blood vessels (especially the capillaries) that most often presents with a wide range of clinical manifestations (as potentially any tissue can be involved), with patients from Western countries more frequently manifesting with neurological and cutaneous symptoms while patients from Asian countries more frequently displaying hepatosplenomegaly and thrombocytopenia. IVLBCL is characterized by an absence of lymphadenopathy, an aggressive clinical course and a poor prognosis.

#### Dane

Klasyfikacja	Synonimy
Choroba	Angioendotheliomatosis proliferans systemisata
	Angiotropowy chłoniak wielkokomórkowy
	Choroba Tappeinera i Pflegera
	Limfomatoza wewnętrzna
	Złośliwa angioendoteliomatosa
	Angiotropic large cell lymphoma
	Intravascular lymphomatosis
	Malignant angioendotheliomatosis
	Tappeiner-Pfleger disease
