

## Opis choroby \*

### Definicja

Renin-angiotensin-aldosterone system (RAAS)-blocker induced angioedema (RAE) is a type of acquired angioedema (AAE, see this term) characterized by acute edema in subcutaneous tissues, viscera and/or the upper airway.

### Dane

#### Klasyfikacja

##### Choroba

#### Synonimy

ACE inhibitor-related acquired angioedema  
Obrzęk angioneurotyczny indukowany blokerem RAAS  
RAAS  
Obrzęk angioneurotyczny indukowany blokerem układu renina-angiotensyna-aldosteron  
Obrzęk naczynioruchowy indukowany blokerem RAAS  
RAE  
ACEI-related acquired angioedema  
Acquired angioedema with normal C1 inhibitor  
Acquired angioedema with normal C1INH  
RAAS-blocker-induced angioedema  
RAAS-blocker-induced angioneurotic edema  
RAE  
Renin-angiotensin-aldosterone system-blocker-induced angioneurotic edema
