

Rozlany hiperinsulinizm oporny na diazoksyd

Kod Orpha: 165988 Kod OMIM:

Opis choroby *

Definicja

Diazoxide-resistant diffuse hyperinsulism (DRDH) is a form of Diazoxide resistant hyperinsulinism (see this term) characterized by recurrent episodes of profound hypoglycemia caused by an excessive/ uncontrolled insulin secretion (inappropriate for the level of glycemia) due to diffuse involvement of pancreas that is unresponsive to medical treatment with diazoxide, often necessitating near total/total pancreatectomy.
